[Home](#) > Mylan recalls valsartan products found to contain NDEA

Generic Name:

Multiple generic names

Trade Name:

Multiple trade names

Company:

Mylan

Notes:

FDA is [alerting](#) patients and health professionals to Mylan's voluntary [recall](#) of 15 lots of valsartan-containing products that contain *N*-nitrosodiethylamine (NDEA).

Not all Mylan valsartan-containing products distributed in the United States are being recalled. Mylan is recalling only those lots of valsartan-containing products that tested positive for NDEA above the acceptable level. The agency continues to investigate and test all angiotensin II receptor blockers (ARBs) for the presence of NDEA and *N*-nitrosodimethylamine (NDMA) and is taking swift action when it identifies these impurities that are above acceptable levels.

FDA has updated lists of [valsartan products under recall](#) and [valsartan products not under recall](#).

In addition, FDA reminds patients taking this medication or any recalled ARB to continue taking their current medicine until their pharmacist provides a replacement or their doctor provides an alternative treatment option. It also is important to know not all ARBs contain NDMA or NDEA, so pharmacists may be able to provide a refill of medication not affected by the recall, or doctors may prescribe a different medication that treats the same condition.

FDA has also posted [questions and answers](#) to assist health professionals and patients.
